SUMMARY

Computer Science graduate (2026) with hands-on experience in AI-based network security and full-stack web development.

EDUCATION

P.E.S. College of Engineering, Mandya **2023 - 2026**
B.E. in Computer Science Engineering CGPA 7.38 / 10

C.P.C. Polytechnic, Mysuru **2020 - 2023**
Diploma in Computer Science and Engineering CGPA 9.06 / 10

TECHNICAL SKILLS

Programming Languages: Python, C, Java
Web Technologies: HTML, CSS, JavaScript,
Database Management: MySQL,
Software Development: OOPs, SDLC, Data Structures & Algorithms
AI / Machine Learning: Machine Learning, Anomaly Detection (Isolation Forest)
Cybersecurity: Intrusion Detection, DDoS and Port-Scan Detection, Firewall Rules (iptables), Threat Analysis
Networking: Basic Networking Concepts, TCP/IP, DNS
Tools: Microsoft Office (Word, Excel, PowerPoint), Visual Studio Code, PyCharm, Git, GitHub, Linux (Ubuntu), Windows,
Languages: English, Kannada, Hindi

PROJECTS

CyberShield: AI-Based Network Intrusion Prevention System

- The system is designed to address the problem of network attacks that go unnoticed because manual monitoring is slow.
- It watches live network traffic and detects DDoS floods, port scans, and suspicious phishing-style domains.
- An AI model learns normal traffic behaviour and flags unusual activity every few seconds, alongside fixed security rules.
- Attackers are blocked automatically and released after a set time; logs and a live dashboard show every incident.

HUNT (Secure-Surf): Website Trust Checker and Chrome Extension

- Designed to address the problem of users visiting fake or unsafe websites without any warning.
- Users can check any website and get a safety score from 0 to 100 across five safety levels.
- The score reflects the site's age, security certificate, reputation, and reported threats.
- A browser extension shows risk alerts on the page and warns when a site requests camera, microphone, or location access.

Online Event Booking and Management System

- Built to make event booking simple by replacing manual registration.
- Users can browse and book events online, and admins can create and manage them from one place.
- Built as the TCS iON capstone project and improved through repeated testing.

INTERNSHIP

Graduate Engineer Trainee (GET) Internship, TCS iON - Job Achiever, IT 2026

- Completed full stack developer training and SDLC at P.E.S. College of Engineering, with the event booking app as the capstone; passed the TCS iON National Proficiency Test and earned the Job Achiever certificate for Graduate Engineer Trainee - IT (July 2026).

PUBLICATION

"CyberShield: AI Based Smart Network Security System," JETIR 13(5), May 2026 (co-author). Paper ID: JETIR2605348
